First Aid:

1. Show that they have completed all First Aid requirements in their Scout handbook. If they don't bring their Scout handbook they can't attend even if they already have a partial.
2. Bring their home and personal first aid kit that has everything except the irrigation syringe and CPR barriers for their kits. The kits must include all items in the attached workbook for their first aid kits.
3. I will have available at cost CPR barriers suitable for their home and personal first aid kits. Home barrier, \$3.75. Personal barrier, \$1.50. Irrigation syringe, \$0.50. I need to double check the prices. Total about \$5.75.
4. If they pass the written CPR test and complete the skills correctly they may purchase an American Red Cross CPR certification card for \$5.00. This is valid for one year. This will be mailed to them later. This is also conditional on at least 8 Scouts meeting the CPR requirements and wanting to purchase a card. I get a lot of push back for less than 8 from the local Red Cross chapter because they need to maintain records of this also. Five dollars is a good deal because the normal price is eight dollars.
5. They need to use my workbook because it matches the video I will be using. The attached workbook is an example only. It needs to be updated to match the new American Red Cross First Aid / CPR video.
